### NOW READY PRICE 25 CENTS

BRYAN ON THE STIMP.

Democratic Leader Making Fight of His Life in Nebraska.

A dispatch from Schuyler, Neb., yesterday, says: With only three hours' rest in his Lincoln home, after his long journey through Texas, Iowa, Ohio and Kentucky, William J. Bryan started this morning on his tour of Nebraska, which is to last until election day, and which promises to be the most remarkable campaign tour in the state's history. The day has been one of great activity, Mr. Bryan delivering five set speeches of one hour each, speaking seven times at different stops for five minutes each time, and talking to more than 40,000 persons, in spite of a rain storm.

Mr. Bryan began his speechmaking in Stromsburg. Thence he went to Osceola, where he spoke during the noon hour. He reached Shelby at 2 o'clock for an hour's talk, and soon after 3 o'clock he began talking at Rising City. At 4:30 o'clock he was addressing an enthusiastic crowd in David City. Then, after a hasty meal, he took the train for this city and went to the city hall, where he spoke for two hours.

Mr. Eryan is making the fight of his life, and indications are that he appreciates the seriousness of the situation in his home state and the effect upon his future the approaching election will have. In spite of his recent illness and his long tour and many speeches, he appeared in the prime of health today and declared he never felt better.

In every place in which Mr. Bryan stop ped today he delivered the same speech, with only slight variations. It touched almost wholly upon the war, the trusts and silver, the latter being given considerable

Very nearly the entire county and the adjacent towns of other countles were represented in the crowd when Mr. Bryan appeared on the platform in Stromsburg. ere were many republicans present. Re-blican leaders say this is evidence that Mr. Bryan's crowds are not fusionists and l are not really in sympathy with his views, but go to his meetings merely through curi-

Fusion leaders, and Mr. Bryan in particbest evidence that a revolution has taken place in the state since the last campaign. and declare that many republicans will vote for the fusion ticket to show their protest against the methods of the administra-

On the subject of the war Mr. Bryan said: "The administration is responsible for the war in the Philippines. It is the natural result of the administration's deliberate act. Had fair promises been made and kept with these insurgents no shot would have been

"I claim that the blood of any Nebraskans killed in the campaign is worth the whole archipelago of which. Spain boasted. It is not a question of the valor of the people of this great republic, because their valor is never questioned, but it is merely a question of whether these people are entitled

Accidents Will Happen.

John Brown, a G. A. R. veteran, of 2446 Marsonn Brown, a G. A. R. veteran, of 2446 Mar-shall st. Fhiladelphia, says: "By a mere accident I came across Dr. Agnew's Catarrhal Powder I was a great sufferer from that dread maindy—Ca-tarrh. This wonderful remedy effected a speedy and permanent cure, and I have been so thankful that I am willing to spend much time in spreading the good news." Sold by F. S. WILLIAMS, 9th and F sts.; EDMONIS & WILLIAMS, 3d and Fa.

to the independence for which they have fought and suffered so long."
Discussing silver the speaker said: "This Issue is as live as when the opposition made such terrific efforts to kill it in 1816. It is not an issue that can be killed, because it thrives on opposition. We are told daily by the opposition press that out here in Nebraska the people have forgotten all about silver. You know how true that is." Mr. Bryan starts in at Syracuse tomor-row and will make six speeches.

Mr. Meiklejohn in Nebraska.

A dispatch from Omaha, Neb., says George D. Meiklejohn, assistant secretary war, arrived in that city last night to ake part in the Nebraska campaign. He is billed to make at least one speech a day until the close of the campaign, opening tonight at Albien, the home of Gov. Poyn-

ter.

Mr. Meiklejohn, in an interview, spoke of the work of the War Department in successfully conducting the campaign in the Philippines, and said that with the 3,000 men on the islands, the 34,000 sent there recently and the 8,000 that will reach there soon, the full campaign will open with at least 42,000. The political situation in the east, according to Mr. Melklejohn, is satisfactory to the republicans.

Fagging at Eton. From the Chautauquan

The system of fagging exists at Eton, as at nearly all large public schools, but it is practiced now in a much modified form. As shortly described, it may be said to be the acknowledged right of the elder boys to exact from the younger boys (their fags) certain services, menial and otherwise. Its origin is obscure; it may have arisen as an economy when schools were poor, as it must save expense and labor for the younger boys to black boots, make tea and boil eggs for the elder ones. But Eton is now exceedingly wealthy, its

endowments being nearly £21,000 a year, and there can be no reason why, because a lad is young, he should have to wait upon his schoolmate as his servant and be ex-posed to the chance of very great tyranny. In the latter end of the last century the fagging was so cruel and excessive that it is reported that often a young fag would be kept up waiting on his master till 1 o'clock in the morning, and being from lack of time prevented from getting his own lessons for the next day, would receive a thrashing from the master for the omission. Many instances of heartrending bullying and cru-elty were practiced by the big boys on their fags were reported, but fagging at Eton has been greatly reformed.

has been greatly reformed.

This and many other improvements were mainly due to the exertions of Dr. Hawtrey, who was headmaster from 1834 to 1853, and who in conjunction with Professon Hodgson wrought most of the changes which have given to the college its present standing. Before Dr. Hawtrey's appointment the number of pupils had fallen to something under 200, the morals and tone of the school were exceedingly low and terof the school were exceedingly low and terrible abuses had crept in. Dr. Hawtrey at once began the work of reform, sweeping innovations were made and new regulations instituted, the tone of the school improved, and the numbers rose to 777, the highest vet attained.

The Observant Bird.

From the Chicago Tribune. "Oh, George!" squeaked the parrot, as soon as the young man came into the par-

lor, "how rough your face is!"

#### ALEXANDRIA AFFAIRS

Business Transacted at Meeting of the City Council.

CHOICE OF CITY ENGINEER DEFERRED

Local Physicians at Loggerheads Over a Recent Diagnosis.

GENERAL AND PERSONAL

Evening Star Bureau, No. 701 King Street, Bell Telephone No. 106.

ALEXANDRIA, Va., October 25, 1899. disposed of at the regular semi-monthly meeting of the city council last night. A ommunication was received from Mayor Simpson stating that several unsuccessful attempts had been made to convene the poard of health which was appointed by ouncil in July, and that, as many of the members had pointedly refused to qualify, he had been compelled to name others in their places. Those newly appointed were Messrs. R. H. Havenner, W. H. May, C. B. Marshall, C. W. Howell and Nevelle Greenaway. The communication was not acted

An ordinance was adopted increasing the salary of the commissioner of the revenue from \$350 to \$600 per annum, the increase to be operative from July 1, 1899, and payable quarterly. A resolution was offered reducing the salary of the city engineer from \$1,500 to \$1,000. It was referred to

from \$1,500 to \$1,000. It was referred to the finance committee.

Mr. Burke from the first ward moved to invite the board of aldermen into joint session for the purpose of electing a city engineer. When the invitation was received by the aldermen an animated discussion followed. The law governing in this case was brought up. It provides that no appointment shall be made until the applicant has passed a prescribed examination, and as no examination had been given since the one taken by Mr. Corse, the board, for the second time, refused to go into joint the second time, refused to go into joint session. The application of Mr. L. R. May-bill of Washington for appointment to the bill of Washington for appointment to the position of city engineer, was presented. The committee on light recommended that the two electric arc lights be removed from the country market and one of them placed at Lafayette alley and the Strand. The recommendation was approved. On application of Mr. Trimyer the other light was ordered to be placed at the corner of Lee and Jefferson streets. A petition for an electric light at the corner of Payne and Cameron streets was referred to the committee on light.

A resolution was adopted by the board of

A resolution was adopted by the board of aldermen directing the city auditor to draw his warrant for \$62.50, payable to the widow of Dr. J. W. Bechtel for services rendered in the smallpox epidemic last winter. The action was concurred in by the lower board.

Dr. Bechtel's Funeral.

The remains of Dr. J. W. Bechtel, who lied suddenly Saturday night while he was en route from Norfolk to this city, were forwarded this morning to Newport, Pa., for interment, Messrs, J. R. N. Curtin and J. H. Trimyer, as representatives of Alex-J. H. Trimyer, as representatives of Alexandria Council, Jr. O. U. A. M., of which organization the deceased was a member, accompanied the body. The funeral services were held in Trinity M. E. Church last evening, Rev. N. B. Masters officiating. Alexandria Council and the Daughters of America attended in a body, and the church was filled during the services.

Cupid's Conquests.

A quiet marriage took place last evening at the parsonage of St. Mary's Church, when Miss Gracle D. Powell, daughter of Mr. Sallie D. Powell, became the wife of Mr. Charles H. Noland, Rev. Father J. H. Cutler officiating. Following the ceremony a reception was tendered the bride and groom at the residence of the latter's sis-ter, No. 308 North Pitt street, M'ss Ada Mott, daughter of Mr. Henry Mott of Baltimore, and Clifford A. Wiley, this city Monday evening, Rev. C. E. Ball of Grace Episcopal Church officiating.

Board of Health Meets.

Another secret session of the board of health was held last evening. In accordance with the resolution previously adopted to transact all business behind closed doors, nothing has been given out, but it has been gleaned from other sources that Drs. Gulick and Gorman were summoned to give opinion regarding the disease affecting a little child of Mr. Thomas Downey. Dr. M. W. O'Brien had been attending e case, and, as before noted, Dr. Carring-n of the United States marine hospital on of the Chited States marine hospital service was called in to make expert diagnosis, with the result fhat the disease was pronounced to be smallpox in a mild form. Drs. Gulick and Gorman, who have viewed the patient lately, stated to the board, it is said, that they discovered no symptoms of smallpox. The child is now said to be well. Some of the local physicians are at logger-heads over the matter.

General Notes of Interest. In the police court this morning Mayor

Simpson disposed of the following cases: Jessie Welby, charged with assaulting Georgiana Kerby, forfeited \$5 collateral by ion-appearance. The case of George Parker, colored,

harged with assaulting Ben Lucas, also colored, was called, the parties having sufficiently recovered from their injuries to appear in court. After a tedious examination, in which it was found that Lucas had fired a gun and Parker had assaulted Lucas, the mayor imposed a fine of 55 upon

The sesqui-centennial committee has drawn up about 100 resolutions conveying the thanks of the committee to every individual and corporation that gave assistance to the celebration.

The funeral of Miss Nannie Patterson, whose death occurred Monday evening, will take place from St. Mary's Catholic Church

Owing to a dense fog on the Potomac, the Norfolk and Washington line steamer did not reach here until 10 o'clock this morn-

REPUBLICANS AT ROCKVILLE.

Gov. Lowndes and Others Discuss Issues of the Campaign.

Special Correspondence of The Evening Star. ROCKVILLE, Md., October 24, 1899. Mr. Thomas C. Noyes, chairman of the republican state central committee for this county, called together in the opera house last evening one of the largest republican meetings ever held in this town. Capt. John McDonald was called upon to preside, He first introduced Mr. John V. L. Findlay, candidate for attorney general, who made an extended speech, in the course of which

"One of the prominent candidates on the democratic ticket stated at a public meeting here the other day that Montgomery county was filled with people who were compelled to emigrate from other states, and were here sowing political corruption by their presence. This was in reference to the clerks and gentlemen from Washington who have come into Montgomery county to live, either because it is the cheaper place or because they like the country better than they do the town; those who have built up the towns along the steam railroad lines and along the electric railroads, such as Takoma, Ken-sington, Rockville, Chevy Chase and Bethesda, and thereby increased the taxable basis of the county, and have improved the farms and introduced more money into the county than it ever enjoyed before. These are the people that the gentleman says should be driven out of what he calls the should be driven out of what he calls the temple of democracy.'
"One would think that such a population

was a great advantage to the county and that the introduction of it would be en-couraged by every possible means. The state of Maryland, I believe, has been dostate of Maryland, I believe, has been doing everything to induce men from Holland and from other countries to settle here and on the eastern shore. It is a little strange and difficult to understand why objection should be made to the settlement of our counties by our own people of the United States, wherever they may come from. This, it seems to me, exhibits a very narrow and illiberal spirit, but it is in state of Maryland, I believe, has been do-ing everything to induce men from Hol-land and from other countries to settle here and on the eastern shore. It is a lit-tle strange and difficult to understand why

the opinion of my opponents, constitutes bribery, then I plead guilty to the charge. As to the other personal letters, I have only to say that I hope the day will never come when I, as a candidate for public office, will not feel that I am doing right in laying my case before the people rather.

#### advice gave me the greatest confidence in the World's Dispensary Medical cines. I bought a bottle of 'Golden Medical Discovery,' took it, and soon com-Association, even so great that I at once left off all former remedies and tried Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets.' I used about menced to feel a little better, then you directed me to take both the 'Golden Medical Discovery' and the 'Favorite Prescription,' which I did. I am now almost entirely well, and do all my work without any pain whatever, and can eight vials of the 'Pellets' and ten bottles of the 'Discovery,' which brought me nearly back to my former state of health." run with more ease than I could formerly walk."

A Great Sufferer.

"I was a great sufferer from dyspepsia for over two years, and I was a complete physical wreck," writes Mr. Preston E. Fenstermacher, of Egypt, Lehigh

Co., Pa. "Had many torturing, gnawing, and aching pains—I think about all that a dyspeptic has or ever could have. I also suffered much with constipation, I tried many different medicines, which were recommended to cure the trouble,

but these only made me worse, and my condition was more sluggish and weak

than before. It seemed that I was getting worse all the time. At the same time my stonach was fit a weak condition. It was so weak that the least and easiest kind of food to digest would get sour in my stomach, and I had such a weak and debilitated appearance that it seemed as if I had hardly any blood in my whole body. Muscles were soft and flabby, circulation poor and slow. Suffered

greatly from cold hands and feet. I wrote to a number of medical firms for medicine and advice, and most of them asked of me a large sum of money to cure me, but this I could not afford. At last I came across an advertisement of

Dr. Pierce's. I wrote to him, stating my symptoms and pains. I received by return mail the best and most substantial advice that I ever before read. This

One of these great scientific

to the end of its tether."

These facts are appalling. The very existence of the human race

In London, England, they are legislating to compel a

condition of the stomach and organs of digestion and

nutrition. When food is perfectly digested and assimilated, when the blood is pure and abundant, disease

finds no foothold. Dr. Pierce's Golden Medical Discovery

makes the body practically impregnable against disease.

It heals diseases of the stomach and other organs of

digestion and nutrition. It increases the activity of the

blood-making glands and so increases the supply of pure

blood. It carries off the waste and poisonous accumu-

lations from the system. It makes a strong, healthy

body, built up of sound flesh instead of flabby fat.

entire keeping with the democratic platform and the democratic policy, both in the state and in the United States. No people can flourish where such ideas are dominant, and the people of this state, and especially the young men of this state, ought to realize that there is no future either for the country or for them in the democratic party." democratic party."

Governor Lowndes followed Mr. Findlay in a neat off-hand speech, which was liberally punctuated with applause. He said, in

more good? "They writhe with more or less virtuous indignation because it is a communication to the county school temehers I promise, if the county school teachers I promise, if elected, to stand by the republican platform and my letter of acceptance, and endeavor to have their miserfy compensation increased and their tenure in office made more permanent. If would not withdraw one word of those letters. The raising of teachers' salaries is a public question, like the reduction of the state tax and oyster legislation, and a most pressing one. I have strong convictions on the subject. I stated my positions in my address before the Teachers' Association at Ocean City, several months ago. Since then, in my travels through the country, I have been all the more strengthened in my opinion. That one who gives brains and energy in That one who gives brains and energy in instructing the men and women of the next generation should receive the miserly pit-tance of \$120 a year, as is frequently the

tance of \$120 a year, as is frequently the case, is a disgrace.

"Never was I so forcibly impressed with this fact than on my second visit to Holland's Island, where a steamer never touches and upon which a governor of Maryland had never set foot. Upon that little strip of land stood one of those buildings which is the crwning glory of our country—a public school house, with free instruction and free books. It was a little bit of a frame house, one story high, but it was filled with some sixty bright and healthy children, imbibling their knowledge from an enthusias-

pitch of enthusiasm. He spoke directly to the point and discussed in a clear and straightforward manner the various issues involved in the campaign. He drew a tell-ing comparison between the record of the democratic party in the management of state affairs and that of the republicans. He eloquently addressed himself to some of the national issues which have an indirect bearing upon the present contest in Maryland, and closed by predicting a grand victory for his party on the 7th of November, thus insuring the state to the republicans in the presidential election of 1900.

the managers in cash the board accepted the securities which were offered under the plan of reorganization, and these securi-ties today would realize \$3 per share more for the old preferred stock than the Hop-

kins trustees and other holders accepted in cash for other holdings.

"This is the transaction out of which Major Venable now attempts to make some political capital."

Representative George A. Pearre was the

IMPORTATION OF MOCHA.

Evidence That the Pure Article is Sent From Aden. E. S. Cunningham, United States consul at Aden, has written to the State Depart-

than placing my entire trust for success in a political ring."

The governor, in the course of his remarks, referred to the criticisms of Maj. Richard Venable, touching the dealings of the state with the Baltimore and Ohio first preferred stock, held in the free school fund. After passing upon the bletter ment regarding the export of Mocha coffee to the United States. He says: "Some time since a prominent merchan of Aden called my attention to a paragraph in an American newspaper in regard to Mocha coffee and its use in the United fund. After passing upon the history of the efforts of holders of first preferred stock to protect their interests against States. The paragraph contained this senence: 'Indeed, there is practically no genuine Mocha coffee in our market.' This statement is quite unjust to American imcorters of the genuine Mocna coffee directrom ports of Arabia. As will appear from the following table, taken from the involce books at this consulate and the consular agency at Hodelda, there have been in-voiced for exportation to the United States

stock to protect their interests against foreclosure of the Baltimore and Ohio mortgages, of the union of the state's interests with those of the trustees of Johns Hopkins University, and the compromise by which the university sold to the reorganization managers the stock at \$75 per share, the governor said:

"This left the state without support in the legal contest, nor was it able to accept with the other holders the \$75 per share, as the state was unable to dispose of its during the year ending June 30, 1809, 32,156 bags (160 pounds each, equal to 5,144,960 pounds) of Mocha coffee. I should think it but reasonable that at least 5,000 bags, which are first shipped to Europe, finally reach the American market without being mixed with infector coffees. with the other holders the \$75 per share, as the state was unable to dispose of its 1,181 shares at private sale and could only dispose of them after public notice, in accordance with the act of the legislature of the state of "Accordingly, after the other parties had "Accordingly, after the other parties had sold their shares, the board of public works advertised the 1.181 shares for sale. They received only one bid, that of the reorganization managers of the Baltimore and Ohio Railroad Company of \$75 per share. This bid was not accepted by the board of public works. Instead of accepting the bid of the managers in cash the board accepted the securities which were offered under the

mixed with inferior coffees.

'But it may be said by some (and I have had letters from importers of other coffees inquiring if it were not true) that the coffee shipped from here as Mocha is grown else-where and brought here for reshipment as Mocha coffee, to obtain the higher price. This impression has doubtless reduced the demand for Mocha coffee to some extent. This charge was brought before the cham-ber of commerce of Aden, and, after inves-tigating it, they issued a statement from tigating it, they issued a statement, from

" It having come under the notice of this chamber that, owing to some parcels of coffee from Java, Singapore and outside ports having been landed at Aden, interest-ed parties at the other side have not scrupled to affirm that this is done with the intention of mixing with pure high-priced Mocha and Harrar varieties, which are regularly exported from this neighborhood reference of the matter to the local author-ities elicited the following reply from Lieut. Col. W. B. Ferris, first assistant political

Col. W. B. Ferris, first assistant political resident, under date of October 8, 1895:
"'"I have the honor to state that all coffee received from Bombay, Singapore, Java or the Malabar coast is bonded in the godowns of the owners at Maalla and the key lodged in the trade registration described by the control office. When the corporal delices partment office. When the owner desires to export, a peon of the department is sent with the key to count the bags and bring them to the wharf. As the merchant or owner can have no access to his goods un-less accompanied by the peon of the de-partment, the transfer of the inferior bean to Aden for mixing with that of Mocha or Harrar is hardly possible."'
"I am informed that practically the same

istom prevails yet, which shows that every recaution is taken by the local authorities o prevent mixing, and from the above let-er of Lieut. Col. Ferris it would seem that it is quite impossible to mix cheaper grades here. An examination of the custom authorities reports shows that foreign coffees are promptly re-exported to other ports, being landed here for transshipment only. Equally stringent precautions are taken in Turkish Arabia to prevent mixing, as I

am reliably informed.
"Doubtless, Mocha is mixed with cheaper coffee in Europe to a great extent, and is shipped to the United States as Mocha cof-fee; but it is hardly possible that an importer who buys his coffee at an Arabian port could get anything but genuine Mocha or Harrar coffee."

An Inopportune Exhibition. From the Cleveland Plain Dealer.

There is a small boy in Cleveland who is great admirer of alligators, and when his loving uncle brought him a pair of young ones some time ago he was extremely hap-

So much so, in fact, that his mother could hardly persuade him to leave them one day when she wanted to take him down to get a new pair of shoes.

But at last he went, quietly enough, and after they were settled in the street car she began congratulating herself upon her "government" of the youth, when suddenly a yell rang out beside her, followed by one or two other small feminine shrieks. She looked round in wonder, and then

gave a gasp of horror and dismay. There sat her young hopeful, blissfully displaying one baby 'gator upon the seat, while another poked its head from the front of his clean white blouse, to the dismay of a couple of elderly ladies near by who were making tracks for the rear end of the car, while one or two other people of the feminine persuasion were flying distress signals, and the men with one accord leaned back in their seats and roared.

The alligators were guickly suppressed.

The alligators were quickly suppressed and taken home, in company with their young master, who went to bed unusually early that day.

And now whenever his mother takes him out she searches him before they leave the
